

# About Labelling Technologies

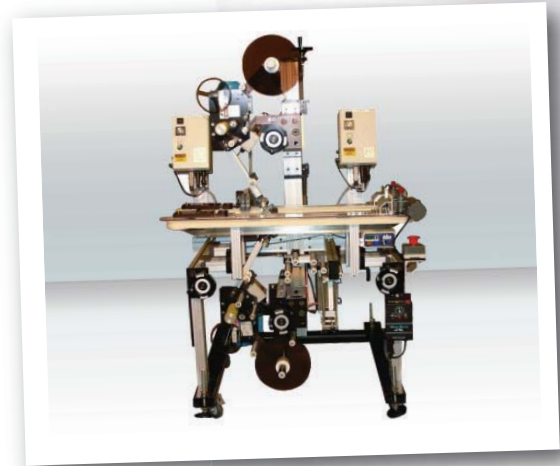

Labelling Technologies specializes in production systems with an emphasis on pressure sensitive label and label-related components. The products we manufacture range from simple label dispensers to sophisticated, high-speed in-line labelling systems.

UT2mACLLS with OEM thermal print engine

## Product Description

Labelling Technologies provides solutions for any combination of decorating (primary and promotional labelling, spot labelling, booklets and coupons), closure, sealing and identification (bar code and label) requirements, RFID tagging/inserting, EAS labelling/inserting.

Wrapped Tamper seal, top and/or bottom clamshell and tray labelling system

## Label Applicators

Utility labelling head and the wrap station of the Basic WrapAround (BWA) system

## Print & Apply Systems

Print and Apply VDR-1AXIS for linerless labelling

## Options & Modules

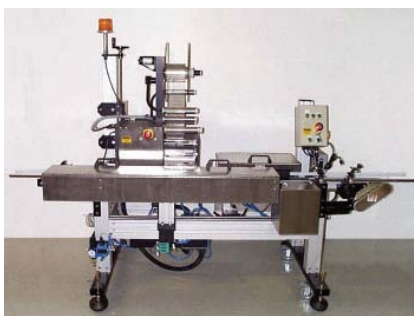

Power unwinds with low label beacons

## A Worldwide Reputation

As a Canadian expert in designing and manufacturing of pressure sensitive labelling equipment Labelling Technologies has built a Worldwide reputation as a problem solving company. We work closely with our customers in the packaged goods, packaging materials, and distribution industries to define short and long-term needs before designing a solution. This approach has led to the development of highly modular labelling equipment.

### Advantages of Labelling Technologies' equipment include:

- Modular design
- Ease of operation and versatility to handle a wide range of container shapes and sizes
- Well engineered, reliable solutions to non-standard applications
- Competitive pricing.

Print & Apply DVD/CD labeller with CD presence sensor and reject station integrateable into a fully automatic line
